Some of the village boundaries and their locations are shown in C.D. Block maps notionally. Physical features (R.F. etc.) shown in C.D. Block maps are replication of 2001 census maps. Jurisdictional changes occurred during 2001-11 have been updated on 2001 census maps. C.D. Block maps included in this publication have been prepared, carving out the boundaries from tahsil maps.

### **SHIVA TEMPLE, MALWAI, ALIRAJPUR**

The temple is located at a distance of about three km from Alirajpur and it can be reached by road.

The east-facing 12th century A.D. temple is now survived by only garbha-griha. The jangha portion of this Bhumij style temple is carved with images of different divinities. The lintel-piece of entrance gate is carved with Ganesha image. There are seven shakhas each on both sides of the gate. Paricharaks and Paricharikas holding lotus are carved below the shakhas.

The garbha-griha is devoid of any image. A Shivlinga might have been installed there. A Gomukh system is built for outlet of water from garbha-griha. There is urushringa decoration on all four sides of the shikhar portion and the shikhar has been developed with the support of ardha-shikhar.

## FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village and Town and ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1st phase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic,

Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns,(ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7. The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Sachin Sinha I.A.S.,Joint Secretary and Director of Census Operations Madhya Pradesh Bhopal. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division. I am thankful to all of them and others who have contributed to bring out this publication in time.

## PREFACE

The District Census Handbook (DCHB) compiled by the Census organization, Government of India is one of the most valuable and useful product of the Census which is brought out for each district in the State having micro level Census and Non Census data . It contains CD Block wise Primary Census Abstract at village/ward level under Census data. The amenities data along with additional information regarding area, population, civic status, land use etc. for every village/town is covered under Non Census data. This publication started from the 1951 Census, but prior to this, a similar publication was released in the earlier censuses. Those publications contained only village statistics, village names and total population. The 1951 Census could, therefore be said to represent a significant step forward, in the process of making detailed census statistics available down to the village level. An important achievement, for the first time in 1991 Census, was that the village level data was presented Community Development Blockwise.

The scope of District Census Handbook has undergone considerable change since 1951. This is basically due to the growing demand for more information. To make the basic statistics available to the data users, as early as possible, the District Census Handbook of 1991 was brought out in a single volume as against the earlier practice of bringing it out in two parts. The volume was however divided in two parts viz. part A and part B. Part A contained the Village/Town Directory while part B contained the Primary Census Data. Continuing the practice of 1991 Census, the 2001 series of the District Census Handbooks also comprised of two parts. However the present DCHB is prepared in two separate volumes. Volume II contains the Primary Census Abstract and Volume I contains the village/town directory of the District.

Volume II of the District Census Handbook contains Village and Town Primary Census Abstract. This provides information on area, occupied residential houses, number of households, sex-wise total population, child population in age-group 0-6, Scheduled Castes and Scheduled Tribes, literates, workers, non-workers and classification of workers into four broad categories i.e. cultivators, agricultural labourers, workers in household industries and other workers in respect of each village and town of the district. Besides the brief history and other major characteristics of the district, inset tables and appendixes based on Houselisting and PCA alongwith analysis in the District Census Handbook provide glimpse of availability of amenities to villages relating to housing, assets available with households and demographic profile of population at tahsil/ C.D block level which are helpful for rural planning.

Volume I contains Village Directory which provides information on infrastructure amenities and land use data at village level i.e. name and location of villages, area, population, number of households, important civic amenities/facilities available in villages like educational, medical, drinking water, drainage, post, telegraph, public call office, mobile coverage, internet cafe, private courier service, commercial and co-operative banks, agricultural and non-agricultural credit societies, recreational and cultural facilities, communications, approach to the village, nearest town and its distance and power supply. Similarly, the

comprehensive statements and their analysis of Town Directory provide valuable information on growth, physical, economic, civic and development aspects in respect of each town of the district. C.D. block being the lowest administrative unit for developmental planning, it is assumed that the data provided at this level would be extremely useful to the planners for formulating micro level development plans.

It may be noted that the village wise area figures presented in the PCA are based on village information as furnished by the revenue authority and the "total area" given for the community development blocks, is the sum total of the area figures of all villages coming under it. The "total area" of tahsil is based on the information furnished by the Commissioner, Land Records, Government of Madhya Pradesh, Gwalior. In some cases the total area shown against the tahsil, may not tally with the total of the area figures of villages coming under it.

The design of 2011 District Census Handbook has been evolved centrally by the Census Commissioner, India and accordingly these books have been prepared by my office. In earlier censuses and until 1991, the cost of publication of these books were borne by the State Government but since 2001 these are being printed centrally by the Census organization. In accomplishing this task we have had the whole hearted cooperation of the staff at various levels of different departments of the State Government. The data supplied by the field level officers have been comparatively checked with 2001 DCHB information and have been cross checked with the data obtained from various departments. An attempt had been made to reconcile the discrepancies by external validation to make it more reliable. I am grateful to all heads of departments of the State Government, officers and staff engaged in the conduct of 2011 Census for their cooperation to accomplish this task.

The compilation of such a huge amount of varied data requires proper planning and close monitoring. We had the honour of having enlightened guidance and encouragement of Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner of India.

The data presented in the District Census Handbook required a concerted team work of officers and staff member of this Directorate who were involved with it at various stages of its planning, supervision, field work, computerisation, preparation of manuscript, maps and printing. I express my appreciation for the painstaking dedicated service rendered by all of them and also to the officers and staff of Data Centre, Bhopal for their untiring cooperation in finalizing the 2011 Census Data.

I shall feel greatly rewarded if the book comes to the expectation of the data users.

## HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and 'most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i) Status and Growth History of towns, (ii) Physical Aspects and

Location of Towns, (iii) Civic and other Amenities, (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

## BRIEF HISTORY OF THE DISTRICT

The district was carved from erstwhile Jhabua district on May 17th 2008. The District is named after its head quarter Alirajpur which was capital of the former princely state of Alirajpur. The territory is hilly and many of the inhabitants are Bhil's. Being tribal dominated community Alirajpur area was being ruled by tribal kings in 15th century. Amanod Dev the desendent of Rana Rathore Naresh of Jodhpur killed Jamora Dodiya Bhil and his army and took the area in his possession. The area is bounded by the pond in Dahod in north, Shivrajpur in Gujarat in west, Narmada river in south and Dholgarh in east. Anand Dev was very fond of hunting .One day Anand Dev entered in the forest of Ali which was ruled by Alia Bhil at that time. The king saw a rabbit there which came running towards and disappeared. The king felt that it should be a magical place as well as pleasant also. The king built a fort there in 1438 and the fort was named Anandawali. Alia Bhil was killed in the battle and Anand Dev became the sole king of the state. After this Anand Dev shifted his capital motipol to Ali and was named Anandawali. King Anand Dev gave Fulmal village to his younger brother, Inderdev in 1440 and declared him the Prime Minister. After this he distributed the territory among his brother. After king Anand Dev his son Chalchal Dev became the king of the territory. Guogole Dev and Keshav Dev were his two sons. On the murder of his father Guogole Dev became the king in 1470. On the other hand his younger brother Keshav Dev captured Jobat area while his father survived in 1465. Krishan Dev the son of Guogole Dev died childless and his nephew Bachharaj became the king. He had four sons. Deepsen was his eldest son. Surat Dev was son of Deepsen and extended the Ali state on the large scale. He had four sons. After the death of Surat Dev his eldest son, Pahar Singh became the king. Due to circumstances created, his brother Pratap Dev did not like to live with Surat Dev and hide himself near Maheshwar. When Ahilyabai holkar found it that Pratap Dev was brother of the king of Ali, she send him back. After returning to Ali, Pratap Dev planned and captured the territory and declared himself the king of Ali in 1765. King Pratap Dev was married to Shishodiya princess of Dharampuri of Gujarat. During 1797 Mushafir Makrani real name Dur Mohammed khan came to Ali territory with his friends. He became a servant of state. Mushafir makrani proved a loyal servant of the state lifelong. He protected the state so many times from outsiders. In 1800 the capital of Ali was transfered to Rajpur. After the death of Maharaj Pratap Dev, Maharani Pratap Kuwarbai gave birth to a boy, named Jasvant Singh. Jasvant Singh ruled the territory up to 1861. After his death his son Gang Dev became the king and ruled from 1861 to 1871 in Alirajpur State. After his death his brother Roopdev ruled the state from 1871 to 1881.

Roopdev had no issue. Therefore Vijay Singh son of Chandra Singh from Sondwa Thakur family was brought to Alirajpur and nominated as the King. He ruled Alirajpur state in 1890 and he also had no issue. Again Pratap Singh second son of Bhagwan Singh was brought from Sondwa and he became king of Alirajpur. Pratap Singh II was born on 12 Sept 1881 and he was made king on 10 June 1891. After he turned adult a first class magistrate power was given to him and the complete power was delegated to him to rule on 27 January 1904. Maharaj Pratap Singh married queen Rajkuwarbai daughter of Bahadur Singh Jadav. Fateh Singh and was educated in Daly College Indore and Raj Kumar college Rajkot. Prince Fateh Singh was married to the princess Rajetukuwarbai on 7th May, 1922. Prince Fateh Singh had six children.

Out of these three were princess and three prince. Maharaja Pratap Singh had built big and beautiful grounds presently used as collectorate office, guest houses, Pratap Bhawan Hospital and schools. King Pratap Singh had very good terms with the British Govt. He was honored by K.C.I. rank for his bravery on 3rd June, 1915. After this on 1st January, 1921 the British Govt. honored him with the title of his Highness forever.

The population of Alirajpur at that time was about five thousand. The roads were very broad and the houses were very airy and beautiful. His Highness Shri Pratap Singh was very fearless and kind hearted king. He punished the dacoits with hard punishment. The population of Alirajpur territory was about 12 thousand out of these 569 were Christian religion follower. Most of the Christians were converted from Bhil caste. According to British rules a state forces was formed on 1st February, 1924 that was called Pratap infantry. There were Gorkhe and Army Band. Many play ground were developed during ruling period of his Highness Maharaj Shri Pratap Singh. A big cricket field (At present Fateh Club Maidan) and Polo ground was famous in the country. Thus Maharaja Pratap Singh II ruled Alirajpur successfully up to 1948 (up to freedom) for 57 years. After his death his grandson Surendra Singh son of Maharaj Fateh Singh was made the king. After this Alirajpur State was merged into Indian Union but his Highness Sri Surendra Singhji was always know as the name of Bapji.

Maharaj Surendra Singh ji was a highly educated personality and he passed I.C.S. Examination. He rendered his services as an Indian embassy under Indian Foreign Services. He had family relation with the former Prime Minister Jawahar Lal Nehru and Smt. Indra Gandhi. After retirement Maharaj Surendra Singh engaged himself in the social services actively. After the freedom in 1947, Alirajpur territory was absorbed into Indian Union. After that this area became a part of Madhya Bharat Administrate.

After constitution of Madhya Pradesh on 1st November, 1956 Alirajpur came into Jhabua district. Although demand of a separate district for Alirajpur was raised but Jhabua was in between Petlawad and Thandla Tahsils on one side and between Jobat and Alirajpur on the other side. Therefore Jhabua was declared as a district headquarter. Since then lirajpr was division headquarter having three big block development offices Alirajpur, Sondwa and Kattiwara respectively. Out of these Sondwa and Kattiwara Tappa were tahil adquarter. Simultaneously a demand of separate district for Alirajpur was being raised regularly.

The villages Vakhatgarh, Mathwar Kakrana etc. were connected with Narmada river in the interior. Public representative, public and political parties were also demanding of separate district for Alirajpur time to time. During Assembly elections 2003, Uma Bharti promised to make Alirajpur as a separate district. Since then the demand of district for Alirajpur was raised strongly. Due to the pressure of regional public, organizations and Chief Minister Shri Shivraj Singh Chauhan delcared Alirajpur a separate district on 17th May, 2008 and thus a new administrative unit, Alirajpur was formed.

## II. CENSUS CONCEPTS

### BUILDING

A 'Building' is generally a single structure on the ground. Usually a structure will have four walls and a roof. Sometimes it is made up of more than one component units which are used or likely to be used as dwellings (residences) or establishments such as shops, business houses, offices, factories, workshops, work sheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence, workshop-cum-residence, office-cum-residence, etc.

But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

### PUCCA HOUSES

Houses, the walls and roof of which are made of permanent materials. The material of walls can be any one from the following, namely, stones (duly packed with lime or cement mortar), GI/metal/ asbestos sheets, burnt bricks, cement bricks, Concrete. Roof may be made of from any one of the following materials, namely, machine-made tiles, Cement tiles, burnt bricks, cement bricks, stones, slate, GI/metal/ asbestos sheets, concrete. Such houses are treated as Pucca House.

### KUTCHA HOUSES

Houses in which both walls and roof are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, unburnt bricks, bamboos, mud, grass, reeds, thatch, plastic/ polythene, loosed packed stone, etc.. Such houses are treated as Kutcha House.

### DWELLING ROOM

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

---

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

### **CENSUS HOUSE**

A 'census house' is a building or part of a building used or recognized as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non-residential purpose or both. If a building has a number of Flats or Blocks/Wings, which are independent of one another having separate entrances of their own from the road or a common staircase, or a common courtyard leading to a main gate, these are considered as a separate Census House.

### **VILLAGE**

The basic unit for rural areas is the revenue village, which has definite surveyed boundaries. The revenue village may comprise of one or more hamlets but the entire village is treated as one unit for presentation of data. In unsurveyed areas, like villages within forest areas, each habitation area with locally recognized boundaries is treated as one village.

### **RURAL-URBAN AREA**

The data in the Census are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. The Urban area comprises two types of towns viz; Statutory towns and Census towns. In the Census of India 2001, the definition of urban area adopted is as follows:

#### **a) STATUTORY TOWNS**

All places with a municipality, corporation, cantonment board or notified town area committee, etc are known as Statutory Towns.

#### **b) CENSUS TOWNS**

All other places satisfying the following three criteria simultaneously are treated as Census Towns.

- i) A minimum population of 5,000 ;
- ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and
- iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 2001 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii) the data relating to main workers were taken into account. In addition the

above stated towns, urban areas also constitutes of OGs which are the parts of UAs.

**URBAN AGGLOMERATION:**

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together with or without urban outgrowths of such towns. In some cases, railway colonies, university campuses, port areas, military camps etc; may come up near a statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may qualify to be clubbed with the existing town as their continuous urban spread( i.e. an Out Growth). Each such town together with its Out Growth(s) is treated as an integrated Urban area and is designated as an "Urban Agglomeration". For the purpose of delineation of Urban Agglomerations during Census of India 2011, following criteria has been adopted :

- (a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town, and
- (b) The total population of an Urban Agglomeration (i.e.all the constituents put together) should not be less than 20,000 as per the 2001 Census. In varying local conditions there were similar other combinations which have been treated as Urban Agglomerations satisfying the basic condition of contiguity.

**OUT GROWTH (OG):**

The outgrowth is a viable unit such as a village or a hamlet or an enumeration block and clearly identifiable in terms of its boundaries and location. While determining the outgrowth of a town, it has been ensured that it possesses the urban features in terms of infrastructure and amenities such as pucca roads, electricity, taps, drainage system for disposal of waste water etc, educational institutions, post offices, medical facilities, banks etc and physically contiguous with the core town of the UA.

**CITY:**

Towns with population of 100,000 and above are called cities.

**HOUSEHOLD:**

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link in finding out whether it was a household or not was a common kitchen/common cooking. There may be one member households, two member households or multi-member households.

---

### **INSTITUTIONAL HOUSEHOLD**

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, observation homes, beggars homes, jails, ashrams, old age homes, children homes, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2011, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

### **HOUSELESS HOUSEHOLD**

Households who do not live in buildings or census houses but live in the open or roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

**10.3 POWER SUPPLY FOR COMMERCIAL USE:**

This category includes electricity connections given for workshops, industries etc. or for any commercial purposes.

**10.4 POWER SUPPLY FOR ALL USES:**

This category includes electricity connection is available for domestic use, agricultural use, and for any commercial purposes.

**11. LAND USE PATTERN:**

The land use area of the villages is given in hectares. The land use pattern in the Village Directory conform to the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India. The Ministry

has recommended the maintenance of records of land use pattern under the 9 categories as indicated in the Village Directory.

## **12. SYSTEM OF DRAINAGE:**

Generally, by drainage system, we mean the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in towns, which are not provided with such underground sewerage system, it is mentioned whether it has open drainage system. There may be possibility of the town having both closed as well as open drainage systems.

## **13. TYPE OF LATRINES:**

The data on various types of latrines both public and private together are collected. The three types of latrines considered here are, Pit Latrine, Flush/Pour Flush Latrine and Service Latrine.

### **(I) PIT SYSTEM:**

The latrines are attached to the pit that is dug into the ground for the reception of night soil, are reckoned as pit latrine.

### **(II) FLUSH/POUR FLUSH:**

A flush latrine uses a cistern or holding tank for flushing water and has a water seal, which is a U-shaped pipe, below the seat or squatting pan that prevents the passage of flies and odours. A pour flush latrine uses a water seal, but unlike a flush latrine, a pour flush latrine uses water poured by hand for flushing (no cistern is used).

### **(III) SERVICE:**

Type of latrine from where night soil is removed manually by scavengers. All other types of latrines are covered under "Others" category.

## **14. PROTECTED WATER SUPPLY-SOURCE AND CAPACITY OF STORAGE SYSTEM:**

There are various sources of water supply and its storage system in the town.

### **14.1 SERVICE RESERVOIR:**

A service reservoir is a water storage container that holds clean water after it has been treated in a water plant, and before it is piped to the end users. These containers are covered, and are designed to keep the water safe from contamination. Their main purpose is to provide a buffer within the water supply system so that water supplies can be maintained across periods of varying demand.

### **14.2 RIVER INFILTRATION GALLERY:**

Infiltration Galleries are capable of supplying large quantities of water, and are used where wells are unable to supply water needs, i.e. where an impermeable rock barrier affects well efficiency, or where surface water sources are too

---

shallow for intake screens. Infiltration galleries are one or more horizontal screens placed adjacent to (on-shore), or directly underneath (bed-mounted), a surface water source.

**14.3 BORE WELL PUMPING SYSTEM:**

A bore well is a well of 6” to 12” in diameter drilled into the earth for retrieving water. The depth of a bore well can vary from 50 feet to 3000 feet. Water is pumped out to surface through electricity/generator.

**14.4 PRESSURE TANK:**

Tank that is used to ensure consistent water pressure and for storage of water. Usually located in basement of house but sometimes (in older settings) located in well pit.

**15. ROAD LIGHTING (POINTS):**

Road lighting means the number of street lights that are maintained in the town.

**16. HOME ORPHANAGE:**

Orphanage is the name to describe a residential institution devoted to the care of orphans – children whose parents are deceased or otherwise unable to care for them. Parents, and sometimes grandparents, are legally responsible for supporting children, but in the absence of these or other relatives willing to care for the children, they become a ward of the state, and orphanages are a way of providing for their care and housing.

**17. WORKING WOMEN’S HOSTEL:**

These may be recognised or non-recognised by any public authority. The data on number of working women’s hostels available in the town are collected with number of seats.

**18. OLD AGE HOME:**

There are two types of Old Age Homes in India. One is the “Free” type which cares for the destitute old people who have no one else to care for them. They are given shelter, food, clothing and medical care. The second type is the “Paid” home where care is provided for a fee. Nowadays, such “Retirement” homes have become very popular in India and they are well worth considering.

**19. STADIUM :**

A stadium is a place, or venue, for (mostly) outdoor sports, concerts or other events, consisting of a field or stage partly or completely surrounded by a structure designed to allow spectators to stand or sit and view the event.

**20. AUDITORIUM/COMMUNITY HALL:**

These are the places where meetings, social functions etc. are organised.

**CIVIC STATUS OF URBAN UNITS:**

Civic Status of a town/city is determined on the basis of Civic Administrative Authority of the town e.g., Municipal Corporation / Corporation, Municipal Committee / Municipal council, Municipality etc.

**SIZE CLASS OF U.A./TOWN:**

Size-class of U.A./Town is based on the population size of the U.A./City/Town.

U.A.s/Towns with 100,000 and above population are classified as Class I U.A.s/Towns. Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000- 19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

**SLUM AREA:**

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as (a) Areas where buildings are in any respect unfit for human habitation; or (b) are by reasons of dilapidation, overcrowding, faulty arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

**MEGA CITY:**

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cutoff point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities and the same criteria of population has been adopted in 2011 census.

## V. BRIEF ANALYSIS OF THE PCA DATA (TABLE 1-35)

Analysis of the PCA data based on Census 2011 is presented here in the form of tables from 1 to 35. Various demographic indicators such as density, literacy, Sex-ratio and distribution of population in different economic activity by rural/urban, male/female and age classifications are presented in these tables. These analysis are presented for Tahsils and CD block levels separately.

It appears from the table that overall 19.5 per cent decadal growth during 2001-11 has been recorded in the district. In rural areas, it works out to 18.7 per cent whereas it is 28.5 per cent in urban areas of the district. At the tahsil level, Jobat has observed the highest decadal growth rate of 23.2 per cent (total) and 23.5 per cent (rural) respectively whereas Alirajpur tahsil has registered the highest urban growth rate of 35.6 per cent. The percentage of urban population to total population of the district is 7.8 per cent in 2011 against 7.3 per cent in 2001.

## VI. BRIEF ANALYSIS OF VILLAGE DIRECTORY AND TOWN DIRECTORY DATA (TABLE 36-45)

Analysis based on Village Directory and Town Directory data pertaining to census 2011 are presented in the form of Inset tables from 36-45. Alongwith the census data, 'Non-Census' data such as village amenity and town amenity data was collected during census 2011. These tables give the number of total villages, proportion of population served by different amenities, availability of amenities by distance, proportion of slum population in towns, etc. A short analytical note is also given below each table.
